

Tax and your PSS pension

What is in this factsheet?

- What you should know upfront
- What components make up my pension?
- What is a tax offset?
- What tax offsets are available?
- How are pensions taxed?
- What are marginal tax rates?
- Where can I get more information?

Who should read this factsheet?

PSS pensioners who would like to know more about tax concessions.

What you should know upfront

It is important that you read the disclaimer below. Before making any decisions, please read the **PSS Product Disclosure Statement (PDS)** and consider seeking advice from a licensed professional such as a financial planner, accountant or solicitor.

What components make up my pension?

Your pension can be made up of three components.

Tax-free component

Your benefit may include a tax-free component. This component consists of your member contributions paid to the scheme from 1 July 1983. It may also include a pre-1 July 1983 taxed component if your eligible service started before 1 July 1983.

Taxable taxed component (part of the pension from a taxed source).

Your benefit may include a taxable taxed component. This component consists of your post-June 1990 productivity and Fund earnings on your member contributions.

Taxable untaxed component (part of the pension from an untaxed source).

Your benefit may include a taxable untaxed component. This component consists of your employer component and any pre-July 1990 productivity and earnings.

Public Sector
Superannuation
Scheme

What is a tax offset?

A tax offset is a reduction in your tax liability. Often a tax offset is described as a percentage (for example, an offset of 10% to a pension). It is different from a tax deduction, which reduces your assessable income.

What tax offsets are available?

There are two tax offsets that may be available to you.

A 15% offset is available on the taxable taxed component of our pension if you:

- have reached preservation age and any part of your pension was from a taxed source, we will automatically apply the offset to your pension when you reach preservation age. Your fortnightly tax will also change to the marginal tax rate, less the 15% offset
- are reversionary pension recipient (regardless of age), that has a taxed component and your late spouse was under 60. You will receive this 15% offset at any age until you are 60 years old. Once you turn 60, this will become tax free
- are an invalidity pension recipient. This offset is available to you at any age.

The taxable taxed component becomes tax-free once you turn 60 years of age.#

A 10% tax offset* is available on the taxable untaxed component if you are:

- aged 60 or over, you are entitled to a 10% tax offset on your untaxed component. We will automatically apply this 10% offset to your fortnightly pension when you turn 60. Your fortnightly tax will also change to the marginal tax rate less the 10% offset.
- a reversionary pension recipient (regardless of age), and your late spouse was over 60, you are eligible for the 10% tax offset on the pension from an untaxed source.

If eligible, these tax offsets will be applied to your pension fortnightly. If you would like to claim this offset as part of your annual tax return (instead of in your fortnightly pension) you will need to tell us in writing.

* From 1 July 2017, the tax concessions on your pension are limited to defined benefit amounts less than \$100,000p.a.

For this purpose, any benefits from a taxed source are considered first followed by benefits from an untaxed source. Any untaxed benefit which then exceeds \$100,000p.a. will not be eligible for a 10% tax offset.

#50% of any benefits from a taxed source that is in excess of \$100,000p.a. will be counted as assessable income.

Tax offset example – Age 60 and over

The following example shows how the tax offset is calculated. If the untaxed component of your fortnightly pension is \$1,600, the offset amount is 10% of the \$1,600 which is \$160.

In line with the PAYG tax tables, and assuming you elect to claim the Tax Free Threshold, you would pay \$226 tax per fortnight before the offset.

You then deduct the offset amount from the amount of tax applicable based on your marginal tax rate, i.e. $\$226 - \$160 = \$66$.

Tax liability for that fortnight would now be \$66.

How are pensions taxed?

The table below outlines the various taxation concessions which may apply to your pension.

	Percentage of tax payable on a taxed source		Percentage of tax payable on an untaxed source	
	Tax-free component	Taxable component	Tax-free component	Taxable component
Under preservation age	0%	Your marginal tax rate	There is no tax-free component for pensions from an untaxed source	Your marginal tax rate
Under age 60 and reached preservation age	0%	Your marginal tax rate less a 15% tax offset	There is no tax-free component for pensions from an untaxed source	Your marginal tax rate
Age 60 and over	0%		There is no tax-free component for pensions from an untaxed source	Your marginal tax rate less a 10% tax offset

What are marginal tax rates?

Marginal tax rate is the term used to describe the method of taxation withholding. Withholding rates are calculated on the basis that, if your pay and circumstances remain consistent throughout the year, you may be entitled to a small refund when you complete your tax return at the end of the financial year.

This system is called **pay as you go (PAYG) withholding**.

For more information about taxation matters please contact the Australian Taxation Office (ATO) on **13 10 20** or visit ato.gov.au
